Ruslan Dudnikov

Senior Unity Developer, 8+ years of experience
Projects | GitHub

Email: jerryletehen@gmail.com
Mobile: +48 608 203 249
Location: Gdańsk, Poland

Skills

- **Unity C#**: UI (Scrolls, Menus, Complex layouts) | Addressables & Asset Bundles, Backward compatibility management | Asset Management | Profiling & Performance Optimization | DI (Zenject) | UniTask | ZString | Localization, Analytics, Ads SDKs (Firebase, Facebook, AppsFlyer, OneSignal, Ironsource, CyberSource) | ECS | Native Android and iOS plugins (e.g. Notifications, Live Activities) | Test Framework | DOTween | Redis | WebGL | VR (SteamVR, LIV SDK) | Physics | Photon
- **Tools**: Git | Jira | Confluence | Bitbucket | GitLab | CI/CD with Bitbucket Pipelines | AWS S3 | AWS CodeArtifacts | Figma | Miro | Postman | Backtrace | DataDog | OpenSearch | Rider | Android Studio | XCode
- **AI**: Kiro (Claude, GPT LLMs) | Specs | MCP | Skills

Experience

- **GameStory** — Remote
  Senior Unity Developer — *Aug 2022 – Oct 2026*
  - Led major meta features and architectural changes, prepared release candidates, and post-release monitoring.
  - Resolved release incidents, crashes and production bugs.
  - Performed code reviews and supported developers, animators with Unity and Git, reducing blockers.
  - Closely collaborated with the Artist and Product teams to design and implement features.
  - Reduced build texture size by 2x and Addressables build size by 30%.
- **WannaPlay** — Remote
  Unity Developer — *Sep 2021 – Aug 2022*
  - Designed architecture solutions, implemented features, prototypes and MVPs.
  - Contributed to team workflow, code review, and documentation.
  - Worked closely with Product and QA on functionality and gameplay mechanics.
- **Murka** — Remote
  Unity Developer — *Apr 2021 – Jul 2021*
  - Developed slots using internal tools and functionality.
  - Assembled animations, complex UI and scripted mechanics.
- **Tango** — Remote
  Unity Developer — *Sep 2020 – Mar 2021*
  - Developed games to be embedded into the native Android and iOS apps.
  - Collaborated closely with native-platform developers to resolve technical issues with the Unity module.
  - Wrote documentation on technical caveats and workflow.
- **Synesis** — Minsk, Belarus
  Unity Developer — *Jan 2020 – Sep 2020*
  - Improved client architecture and refactored legacy code.
  - Developed features that improved the user experience.
  - Fixed bugs and client-server communication issues.
- **Iridescent Studio** — Minsk, Belarus
  Unity Developer — *Apr 2018 – Jan 2020*
  - Developed high-load, multi-user educational VR experiences.
  - Tested and improved quality with the team by meeting real users.
  - Bug fixing and performance improvements.
